Training Calendar 2017/18

All sessions are one hour

December (12.00-13.00)

7 th (Thu)	Statistics
14 th (Thu)	Literature Searching
20 th (Wed)	Critical Appraisal

January (13.00-14.00)

4 th (Thu)	Statistics
8 th (Mon)	Literature Searching
18 th (Thu)	Critical Appraisal
24 th (Wed)	Statistics

February (12.00-13.00)

1 st (Thu)	Literature Searching
9 th (Fri)	Critical Appraisal
12 th (Mon)	Statistics
20 th (Tue)	Literature Searching
28 th (Wed)	Critical Appraisal

Your Outreach Librarian – **Helen Pullen**

Whatever your information needs, the library is here to help. Just email us at library@uhbristol.nhs.uk

Outreach: Your Outreach Librarian can help facilitate evidence-based practice for all in the team, as well as assisting with academic study and research. We also offer one-to-one or small group training in **literature searching, critical appraisal and medical statistics**. Get in touch: library@uhbristol.nhs.uk

Literature searching: We provide a literature searching service for any library member. For those embarking on their own research it is advisable to book some time with one of the librarians for a one-to-one session where we can guide you through the process of creating a well-focused literature research. Please email requests to library@uhbristol.nhs.uk

1. Creating a COMMUNITY of learning and practice.

Author(s): Cuthill, Fiona; Anderson, Judith; Shiel, Alison

Source: Community Practitioner; Aug 2017; vol. 90 (no. 8); p. 35-38

Publication Date: Aug 2017

Publication Type(s): Academic Journal

Available at [Community practitioner : the journal of the Community Practitioners' & Health Visitors' Association](#) - from ProQuest (Hospital Premium Collection) - NHS Version

Abstract:The article describes the case of the National Health Service (NHS) in Lothian, Scotland where practice teachers designed a community of learning and practice approach to practice teaching. Topics covered include the increasing awareness of the impact of adverse childhood experiences in the early years on health outcomes in later life, the importance of the relationship between the supervisor and student and the goal of increasing the capacity to supervise health visiting students.

2. A JUGGLING ACT.

Author(s):

Source: Community Practitioner; May 2017 ; p. 12-13

Publication Date: May 2017

Publication Type(s): Academic Journal

Abstract:The article focuses on the changes in public health nursing in England and their implications for the services, the practitioners and the communities they serve. Topics covered include the emergence of a blended service that removes the distinction between provisions for zero to fives and those for school-age children, the job losses caused by the changes and the departure of skilled community nurses.

3. A qualitative study exploring parental perspectives and involvement in health visiting services during the Health Visitor Implementation Plan in the South West of England.

Author(s): Brook, Judy; Salmon, Debra

Source: Health & Social Care in the Community; Mar 2017; vol. 25 (no. 2); p. 349-356

Publication Date: Mar 2017

Publication Type(s): Academic Journal

Abstract: Internationally, there is a strong interest in engaging the public more widely in both the development and governance of public services. This study aimed to explore family perspectives on the introduction of a new policy initiative called the 'Health Visitor Implementation Plan' (Department of Health [2011] Health Visitor Implementation Plan 2011-15: A Call to Action) and their experiences of the new health visitor service provision. The policy aimed to increase the health visitor workforce by 4200 additional practitioners between 2011 and 2015, in parallel with introducing a new service model to provide comprehensive and accessible support for parents with children 0-5 years. Using a qualitative approach, data were collected via semi-structured interviews and focus groups with 22 parents between March 2013 and March 2014. Questions focused around the extent to which the new service met parental expectation and need. Participants were recruited through Children's Centres and interviewed during established group sessions. Analysis was conducted using thematic analysis and constant comparative methods. The participants were asked to share their experiences of the health visiting service and their views on this national policy initiative. Although asked to comment on the policy at nation and local level, their responses were predominantly around personal experience. Parents welcomed the increase in workforce capacity and positive experiences centred on health visitors who were caring, knowledgeable, skilled and facilitated positive outcomes. Many of the negative experiences were seen to be due to poor relationships between the parent and the health visitor. Parents were influenced by the communication skills and personal attributes of the individual health visitors, including time to listen. The strength of parental opinion indicated that parents are willing to contribute to service development, consequently policy makers and health visitors themselves need to have clarity around the purpose and mechanism of parental involvement if meaningful partnership is to become a reality.

4. State of child health in the UK is unacceptable.

Author(s): Ellis, Judith

Source: Nursing Standard; Feb 2017; vol. 31 (no. 25); p. 27-27

Publication Date: Feb 2017

Publication Type(s): Academic Journal

Abstract: In the article, the author discusses developments in the healthcare sector in Great Britain as of mid-February 2017, particularly the alleged lack of a national strategy dealing with the need of infants, children and young adults in the country. Also cited are the report by the Royal College of Paediatrics and Child Health on the issue, the broadening gap in health inequalities in the country, and the effect of maternal health and well-being on child health outcomes.
