

# International Clinical Trials Day

## 20<sup>th</sup> May 2016

Bristol Heart Institute atrium, 9am – 4pm  
and in clinical areas around the Trust

Teams from various specialties in the Trust will be showcasing how research is having an impact on patient care, with examples of trials along with interactive and informative displays.

## Are you interested in research?

This event is aimed at anyone – patients and staff – interested in finding out about research in the Trust, and those wanting to get more involved in supporting or running a study.

Each year, International Clinical Trials day is celebrated around the world in order to raise awareness and inform people about clinical research. 20<sup>th</sup> May is the day that the first clinical trial was started by James Lind in 1747. Whilst a ship's doctor on HMS Salisbury, he carried out experiments to discover the best treatment for scurvy.
